

A Laser Focus

We moved our company here to be part of the region's world-class semiconductor cluster. What we discovered was one of the best places in the world to build both a great company and raise a family.

Where else can you develop and manufacture the world's leading high-power lasers for healthcare, defense and industrial applications, then 15 minutes later be racing Laser sailboats with world-champions?

Fresh, laser-focused minds produce big results. Our team leads the world in key laser applications. Together, we have built a company that has grown +40% for eight years straight. Plus, we still have time to mentor the next generation in math and science.
